KASHISH SHARMA

iOS/ Web Developer | UI/UX Designer

PROFESSIONAL SUMMARY

"Programming is not about typing, its about thinking."

I am a computer science student who enjoys connecting the dots: be it ideas from different disciplines, people from different teams, or applications from different industries. I have strong technical skills and have an academic background in coding. My passion lies in solving problems and tailoring websites and apps from scratch and communicating complex ideas to non-technical stakeholders. I am able to jump across verticals to deliver dynamic solutions.. For over 2 years, I have completed Hundreds of Projects for Clients, reaching over 25k+ People for websites, apps, digital marketing and graphic designing. From making an e-commerce shopping app to launching my startup, all the way to Website and UI/UX Concepts, I have been freelancing for a while and it is my goal to ensure that brands are made the way that my clients want.
