

# Dhanraj Patil.

**Senior UI Developer**

**Mobile:** +91-8446533918

**Email:** [dhanraj.patil@hotmail.com](mailto:dhanraj.patil@hotmail.com)

**Alternate Email:** [dhanraj.a.patil07@gmail.com](mailto:dhanraj.a.patil07@gmail.com)

---

## Career Objectives:

Achieving a challenging position with the state of art and technology where an analytical problem solving skill, dedicated hard work can be put in for the successful completion of work.

## Experience:

---

- ❖ Working as a **Senior UI Developer-BA4** in **Barclays Global Services Pvt Ltd, Pune**, since March 2021.
- ❖ Worked as a **UI Developer-BA3** in **Barclays Global Services Pvt Ltd, Pune**, from Aug 2017 to Feb 2021.
- ❖ Worked as a **Software Engineer** in **Amdocs Pvt Ltd. Pune**, from March 2017 to Aug 2017.
- ❖ Web development experience as **Senior System Engineer** in **Infosys Ltd.** from Jul 2016 to Feb 2017.
- ❖ Worked as **System Engineer** in **Infosys Ltd.** from Mar 2015 to Jun 2016.
- ❖ **System Engineer Trainee** in **Infosys Ltd.** from Dec 2014 to March 2015.

## Professional Summary:

---

- ❖ Working experience as a **Software Developer** on Web platforms.
- ❖ Operational experience of designing and programming Web application with different technologies such as **JavaScript, JQuery, Angular JS, Ember JS, React JS, Redux, Bootstrap, HTML5 and CSS3, SASS, Angular 6.0, 7.0, Salesforce CRM, Lightning Web Components, Apex Classes, Triggers.**
- ❖ Hands on experience of developing backend restful web services using **Apex classes** (Salesforce Programming) and hands on experience of **SOQL** framework for persistence/retrieval of the data.
- ❖ Hands on experience of developing designing Architecture of UI using **Lightning Web Components** and **LDS** and creating Reusable components like **Data Table, Modals, Duel Slider, Duel Pick-lists.**
- ❖ Hands on experience of developing backend restful web services in **Salesforce.** hands on experience of **creating custom objects and handling them with Triggers** for persistence of the data.
- ❖ Strong knowledge of **SDLC & STLC** concepts with different models.

## Technical Skills:

---

- ❖ **Operating Systems** : Linux, Windows 7, Vista SP 2, XP
- ❖ **Backend Programming Skills** : Salesforce, JAVA, Apex, Triggers.
- ❖ **Frontend Programming Skills** : JavaScript, Angular JS, Ember JS, React JS, JQuery, Redux, Bootstrap, HTML5, CSS3, SASS, Angular 6.0, 7.0  
Lightning Web components.
- ❖ **Database Exposure** : Postgres.
- ❖ **Others** : SVN, Git, Net-beans, Eclipse, IntelliJ Idea, Perforce.
- ❖ **Testing** : Unit Testing and Integration Testing.

## Projects Profile:

---

> **Project Name :** **List Manager Application (Since Jul 2021)**  
**Environment :** **Lightning Web Components, Apex**  
**Team Size :** **6**  
**Role :** UI Developer and Salesforce BackEnd Developer

**Description :**

An Application which will help users in daily tasks. We have created List Manager application in which users can create list of their clients and keep track of all their tasks related to those clients. They can connect one by one using call button and can check when they last connected with those clients. They can see all details of the clients in table. They can add columns and update columns. They can share the list with other users. They can search the client by any field and search the client companies too.

They can add new clients to Lists, by searching clients and Drag and drop functionality. They can check all the interactions they have made these clients. All the details of each client. They can email all the clients in bulk. Can add bulk of the client in the list using excel.

> **Project Name :** **Reusable UI Web Components Library (Mar 2021 to June 2021)**  
**Environment :** **Lightning Web Components, Apex**  
**Team Size :** **2**  
**Role :** UI Developer

**Description :**

We have implemented our own components with functionality that does not exists currently with Base lightning web components like Data-Table and Dual-listbox and Slider.

Data-Table:

- Grouping of Data-based on columns
- Repositioning rows by Drag and Drop
- Repositioning columns by Drag and Drop
- Resize columns width
- custom columns like links, button set, context menu
- Editable columns like dropdown, checkbox, text-box
- sorting, pagination,

Slider Range:

created component to set the range with colours to show difference.

Dual ListBox:

Listbox to select values from available values, with customisation of set of buttons for each value

**Responsibilities:**

- Designed Priority Contacts Screens and Teams Screen.
- Created services in Salesforce for CRUD operations on Priority Contacts.
- Created custom objects and triggers to handle dynamic behaviour of Priority Contacts Lists.

> **Project Name :** **Intranet Web Application (Priority Contacts) (Jan 2020 to Feb 2021)**  
**Environment :** **Angular 6.0, Angular 7.0, HTML5, SCSS, Salesforce, Apex, Triggers**  
**Team Size :** **4 (UI-TEAM) + 5(Backend Team)**  
**Role :** UI Developer(Angular), Salesforce BackEnd Developer(Apex, Triggers)

**Description :**

**Priority Contacts** Application is an Intranet Application, where our Business Users can create list of their priority contacts and manage them thought the daily work. Like assigning equities and shares related information with group of priority contacts. Assign these groups to specific agents. Calculating agents points basis of no of contacts and period of time they handle.

This application handles the Agent's teams and their expert skills so priority contacts get assigned to

particular agents.

**Responsibilities:**

- Designed Priority Contacts Screens and Teams Screen.
- Created services in Salesforce for CRUD operations on Priority Contacts.
- Created custom objects and triggers to handle dynamic behavior of Priority Contacts Lists.

> **Project Name :** **Intranet Web Application (Flightdeck) (Sep-17 to Dec 2019)**  
**Environment :** **Angular JS, Angular 6.0, Angular 7.0, Bootstrap, HTML5, CSS3, SCSS**  
**Team Size :** 4 (UI-TEAM)  
**Role :** UI Developer

**Description :**

Flight-deck Application is an Intranet Application, Our Users uses it for their daily work requirements like adding clients, creating meeting with them, Storing new Opportunities with these clients. This application helps users to create contacts of their clients, making separate entry for each their communication with clients and communication details too. Users can create companies of their clients and map their clients to companies. There are many rules In banking domain for Clients, All these rules are developed in this application.

**Responsibilities:**

- Implemented Contacts and Companies Screen.
- Generalization of the components so that can be used multiple places.
- Integrated the Root services to fetch data and show on components.
- Services and Utilities has been created to reduce the code duplications.

> **Project Name :** **Creation of Generalized Widgets (Mar-17 to Sep-17)**  
**Environment :** **React JS, Redux, JQuery, Bootstrap, HTML5, CSS3, SCSS**  
**Team Size :** 5 (UI-TEAM)  
**Role :** UI Developer

**Description :**

Widgets are has been developed in such way it can be useful in many other products of the customer. So Generalized UI and implementation has been done. Widgets like Prizes and Configuration, Products, Account Info, Bill have been implemented. Data will be provided to widgets from the App store created using Redux Framework.

**Responsibilities:**

- Implemented Prizes and Configuration widget.
- Generalization of the widget so it can be useful in many scenarios.
- Integrated the widget with other widgets.
- Reducers has been implemented and integrated to app store.

> **Project Name :** **Intranet Web Application for Multinational Bank (May16 - Feb17)**  
**Environment :** **Angular JS, JQuery, Bootstrap, HTML5, CSS3**  
**Team Size :** 2 (UI-TEAM)  
**Role :** UI Developer

**Description :**

MAD/MAR – One of the modules of Intranet Web-App for sales people for creating the recommendation of the investment by customers and providing that recommendation to all customers via email. Using this application sales people can create recommendations for different business areas and products which customers are going to deal. Sales people can edit existing recommendation before provided to customers. They can clone, delete recommendations. They can view and search and filter their all recommendations.

Contacts Management – One of the modules of Intranet Web-App for sales people for creating contacts of their customers and colleagues. They can edit and delete their contacts on the basis of web-permissions. They can be able view & search the all contacts. They can be able to see the editing history of the contact.

**Responsibilities:**

- Implemented grid representation of the data like searched contacts and recommendations.
- Implemented integration of the other modules like ui-grid, ui-tree, angular-sortable, angular-toastr.
- Implemented integration of restful web-services.

> **Project Name :** **Retail Banking Web Application for Multinational Bank (Apr15–Apr16)**  
**Environment :** **Ember JS, JQuery, Bootstrap, HTML5, CSS3**  
**Team Size :** 9 (UI-TEAM)  
**Role :** UI Developer

**Description :**

DASHBOARD - One of the modules of Retail Banking Web-App for all banking customers, who can see their all banking statistics in the graph form on one page with different widgets and able to do all major actions from the same page. The actions include individual tasks, messages, accounts, FX, to-dos etc. They can be able to filter their statistics by the criteria's like country, currency, fx etc. Filter can be applied to one widget or all widgets. They can customize their dashboard as how they want to see it.

**Responsibilities:**

- Implemented 3 widgets like individual tasks, accounts, to-dos.
- Implemented filter functionality for all widgets and individual widget.
- Solved bugs in dragging and dropping functionality of widgets for customization of dashboard.

---

**Projects Profile (Academic):**

**Project Name :** **Prevention of SQL Query Injection using Random-4 Algorithm.**  
**Environment :** JAVA, Postgres  
**Team Size :** 4  
**Role :** Software Developer and Tester

**Description :**

- Simple Implementation of Random-4 Algorithm and integration with database.
- Simple Table structure has been created in database for just encryption such that which letter should be encrypted to what.

**Responsibilities:**

- Review and Analyze requirement Document as specified by client.
- Involved in coding for the same modules.
- Participation in weekend reviews with Team Members.
- Module wise unit and functional testing of application.

---

**Education Qualification:**

- > **Bachelor of Engineering in Information Technology**, June 2014 - First class with Distinction **67.33%**
- > **Diploma in Engineering in Information Technology**, June 2011 - First class **74.45%**
- > **SSC**, June 2008 – **86%**

---

**Extra-Curricular Activities:**

- > Participated in State Level Project Presentation at St. Xavier's College of Engineering, Mahim With HTML Based Project "Asia the Continent" in 2009.
- > Participated in National Level Blind Coding Competition at AVCOE, Sangamner in 2012.

**Personal Details:**

---

**Name** : Dhanraj Patil.  
**Marital Status** : Married  
**Nationality** : Indian  
**Languages known** : English, Hindi, Marathi, Gujarati  
**Date of Birth** : 4<sup>th</sup> July. 1993  
**Present Address** : Wagholi, Pune.

Date:

Dhanraj Patil.
