## PROFESSIONAL EXPERIENCE

Technoloader PVT LTD.

2021 – Present

### Full Stack Developer (MERN Team)

- Having worked as a full-stack web developer for more than 2+ years, I have a deep understanding of front-end technologies, restful web services, and database design.
- Strong knowledge in MERN Stack with vast experience in building Web Applications, used React.js for client side, Node.js/Express for server side and MongoDB, SQL Server for database.
- Proficiency in creating user interfaces with React.js/Redux, as well as a solid understanding of state stores, middleware, action creators, reducers, and containers.
- Create useful web applications by converting wireframes and PSD designs.
- To come up with software solutions, collaborate with management and development teams.
- Participate in conversations about project scheduling, planning, and design. To verify effectiveness, test the software.
- Planning and redesigning our backend terminology system's architecture so that I can convert my programme from a single threaded system to a multithreaded system and unleash its full power.
- I am in charge of a project to re-engineer processes using blockchain technology to increase their responsiveness and efficacy and to simplify and streamline end-to-end service operations.

Variable Soft.

2016 – 2020

### Linux Server Administrator

- Responsible for company's local Linux Network – GNU/Linux installation, management, and troubleshooting.
- Create, maintain, and develop features for the platform, infrastructure, and applications.
- Planning initiatives to ensure daily application performance and restore smooth operation in the case of a significant disruption (e-mail system and internal communication)
- For them to connect with one another and take care of their own physical server needs, I was developing client-side software. In the other part of my job, I was taking care of the clients, answering their support calls and offering solutions to their issues.

## EDUCATION

Institute Of Advance Network Technology, Jaipur

2019

### Certified Hardware And Network Administrator

- Finding various security issues in security domain with the skillset of penetration tester.
- I was running line server environment learning about different type of servers.

Dr. K.N. Modi University, Newai, Tonk

2018

### Diploma in Mechanical Engineering

## SKILLS & OTHER

Skills: ReactJS, ReduxJS, NodeJS, NextJS, NestJS, Python, MongoDB, MySql, FireBase, Docker, Kubernetes, GitHub, Git, BitBucket, SocketIo, WebSockets, AWS, Linode, Heroku.

Web Architecture: Monolithic architecture, micro-services architecture.

## PERSONAL PROJECTS

- NextWeare:- NextJS Project, NextWeare makes advantage of the most recent iteration of next js for react, which includes quick components for image rendering, logic building, route management, and some react redux features.
- AirBnb Clone:- Users can select their desired travel dates and housing choices with an AirBnb clone. It also offers a section with several pages where users may look at pictures of the place to get a feel for how it looks.
- Amazone Clone:- The React Context API is a mechanism for a React app to efficiently create global variables that can be passed around. It is used in this simple React project. This is an alternative to "prop drilling," which entails passing along props from grandparents to grandchildren to parents and so forth.
