PROJECTS

Project Name - Automation of Usecases

- 1) Automated the reset password usecase which was earlier done by the Security team manually. But now users can reset their password after a month by just mailing it to ignio.

Technologies used: Groovy

- 2) Automated the customer onboarding task which was earlier done manually with no track of progress. But automation not only helped in fast and smooth onboarding of customers but also proper track of record is maintained for every customer onboarding.

Technologies used : Groovy,Powershell

- 3) Automated the tasks of installing filebeat and metricbeat on servers.

Technologies used : Groovy,Bash

- 4) Automated the tasks of starting and stopping virtual machines under resource groups.

Technologies used : Groovy,Powershell
