## Software Engineer

 LinkedIn  +91-6376068337  abhisk.mhra@gmail.com  Github

### Profile

As a full-stack developer, I have honed my skills in React JS ecosystem along with building APIs with power-packed features for clients. I have also converted figma designs to live running web applications and designed backend architectures integrating lambda functions, ec2, RDS, etc, and several other services together packed into one serverless model.

### Skills

- React JS
- Node JS
- Unit Testing
- Git
- MySQL
- AWS
- Serverless

### Professional Experience

2021 Sep – present  
Pune, India

#### **Software Engineer - I, Wednesday Solutions**

- As a Software Engineer in Wednesday, I take care of:
  - Helping with hiring and onboarding new joiners within Wednesday's engineering team.
  - Building a new open-source platform with the Serverless framework.
  - Work on client projects with challenging use cases.
- As a part of this role, I have also developed expertise in NodeJS, Serverless, AWS Services, Unit testing, and E2E testing. I have also gained deep experience and gone hands-on with JS. While at the same time, picking up skills in leadership, and ownership, and enhancing my communications skills as a result of working on challenging client projects.

### Accomplishments

- Heavily contributed to an open-source project of the company fully based on React JS by
  - Added new features on top of existing ones.
  - Brought up the overall unit test coverage from 40% to 100%.
- Architected a custom alternative for a third-party service that led to a reduction in the cost of production by 55%
- Written scripts with multiple testing scenarios which can generate 10000+ concurrent requests to a server for stress testing APIs and to validate the robustness of APIs and fault tolerance capabilities.

## Projects

### **Insta-Breeze Web App, Social Media App** [↗](#)

- A social media web application similar to Instagram.
- Built Using *React JS & Chakra UI*

### **PokeGo Web App, Pokemon Listing App** [↗](#)

- Get to know amazing and new informations about various Pokemons.
- Built using *React JS, Ant Design, and Styled Components*.
- Has features such as *Infinite Scroll* and *Lazy Loading*
