COURSEWORK

GRADUATE

Database Management System
Operating Systems
Object Oriented Programming
Full stack Web Development

SKILLS

PROGRAMMING

Programming language:

• C++ • Javascript

Backend Technology:

• Node JS • Express JS

Frontend Technology:

• React JS • Bootstrap 5 • CSS

Database:

• SQL • MongoDB

PERSONAL PROJECTS

YELPCAMP CAMPGROUND

- YelpCamp is a website where users can create and review campgrounds. To review or create a campground, an account is required.
- Cloudinary is used for end-to-end image management.
- MapBox API is used to display the locations of campgrounds on a map.
- Passport JS is used for authentication purposes.
- This project is built using Node JS, Express, MongoDB, and Bootstrap. Passport JS was utilized for authentication.

GOALMINDER

- The website enables you to set and track your personal goals
- Features customizable reminder emails to help keep you on track
- Nodemailer library utilized for email reminders
- Developed using a tech stack of Bootstrap, Node.js, Express.js, and Passport.js for authentication

AMS - ADVANCED ATTENDANCE MANAGEMENT SYSTEM | MERN

- Utilizes webcam for real-time face recognition and records attendance in a dynamic table built with React Bootstrap.
- Developed using MERN Stack, OpenCV, Flask, and Python.

ACHIEVEMENTS

MICROSOFT ENGAGE MENTEE 2022 | MICROSOFT 5/2022 - 06/2022 | Remote

It is a program run by Microsoft to give students a chance to be mentored by Microsoft. A challenge is given to you for a period of 1 month in which you have to work on the problem statement with guidance from your mentor. During this program I worked on a Face Recognition WebApp which was built using MERN stack.
